Tandem paragliding flight from Pian del Crep

The tandem paragliding flight is the first and most accessible approach to the free-flying world. Flying like a bird over the woods and the meadows is different from seeing them from the top of a mountain: it is another dimension. You do not need any special training nor physical or courageous talents. The expert hands of the instructors will accompany you as you become acquainted with the sky and the landscape of Pecol. All the equipment for the tandem flight is provided by the school. The passenger needs only a pair of sports shoes and heavy clothing. Paragliding is a safety sport, however you will stay with the feet in the air all the time. Every precautions must be taken for any eventuality. The passenger relies totally on the competence and the knowledge of the pilot and must collaborate with him just during take-off. The passenger and the pilot wear an harness with the suitable protective devices and an helmet. The paraglider is equipped with a safety parachute. The pilots are paragliding instructors with the necessary experience, qualified for tandem paragliding flights.
